Eternal Peace, the Immediate Need of Afghan Nation

Proclamation of the Event

The same way as other developed nations, Afghans need peace and assume it as the ultimate desire for a brighter future but sadly over 4 decades, the Afghans among themselves have been put apart from each other. Afghan nation has been suffering the disunity for decades and bear brunt of human lose at the daily basis.

During the Bonn Conference, transitional government and the years followed by; a number of men of influence and powerful figures have destroyed peace efforts at all front as peace could have endagngered their power and influence.

With their ultimate force of these illegitimate influentials, they started to torment Afghan nation, splattered peace efforts, killed or drove way their political opponents, created obstacles toward a developed future, and specifically started to disturpt and dismante stability process in the country. With these fractures, a huge number of Afghans stood against the Afghan government which amid widespread insecurity and vanished peace from the country.

We assume that, beside the corrosive causes mentioned above, there are a number of other national and international destructive reasons having sabotaged the peace making efforts. We can namely mention that the absence of pragmatic approaches and mechanism for peace, interpreting peace as conundrum, week stance and commitment of government for reconciliation, rigid conditions of Taliban and other opposed armed groups, and the ongoing proxy war for ensruing outsiders benefits can be the ground realities for what we suffer today.

We can also recall that lack of cordiality of international partners, ambigious role of neighboring and regional countries, lack of strong stance of government toward peaceful future, the play of regional and international Mafia gangs, and the number of other causes have plunged us into such infamous infighting; hence, we all pay high cost today.

As peace and stability are equally important as water and other vail means of life, we, the (National Stability Society) unify and amplify our voices through this Grand National gathering for eternal peace. We do want peace in the country, no matter, even if it cost considerable deep changes in the government or amendments in operative laws of the country.

1. Along with the clean up of the above mentioned debilitating issues, we ask for social justice to be ensured.
2. The power should not be dispensed only between strongmen and their cronies as national power belongs to the whole Afghan nation.
3. We all should trust on peace and future stability
4. Both Government and Oppositions should soften the condition for peace.
5. Armed opposition should swap armed opposition with political opposition
6. Government should see peace as the vital needs of Afghanistan and must rehash the peace mechanism at all sectors.
7. Peace process should not be used/seen as mean of political or financial gains
8. National and historic values should not be gambled with the peace process
9. Afghans should raise the demands of peace with all power to obliged government to expedite the process.

10. Afghan nation should pressure Afghan government in the peace process and as past decade, should not remain remiss.
11. Neighboring, regional, international, noticeably Islamic and Arabic countries should rethink on their strategies toward Afghanistan, reconsider the Afghan life, and at least help Afghans to survive and finally not to be killed painfully everyday.

Along with bringing peace and stability to Afghan nation, the unity government must keep their personal differences aside and seriously consider the number of subversive national issues such as extreme poverty, monumental joblessness, law enforcement, blatant corruption, pervasive drug business, and timely, fair and inclusive election which can have domino effect on the future of Afghanistan.

Lastly, we reiterate that eternal peace and country-wide statibility is the substantial need of every Afghan and, no matter what should happen, peace should come to Afghanistan within the limit of sageguarding the national interests.

Sincerely,

Leadership of the National Stability Society
